DC MOTORS UK

DC Motors Digital Experience

Customer website + workshop management

26 October 2026

Product introduction for DC Motors Ltd

Website and workshop, working together

One customer enquiry can stay connected through the whole visit

01

Discover

Clear services and a direct enquiry path

02

Request

A calendar slot with vehicle details attached

03

Agree

Staff approval or a suggested time

04

Manage

Workshop work and customer history

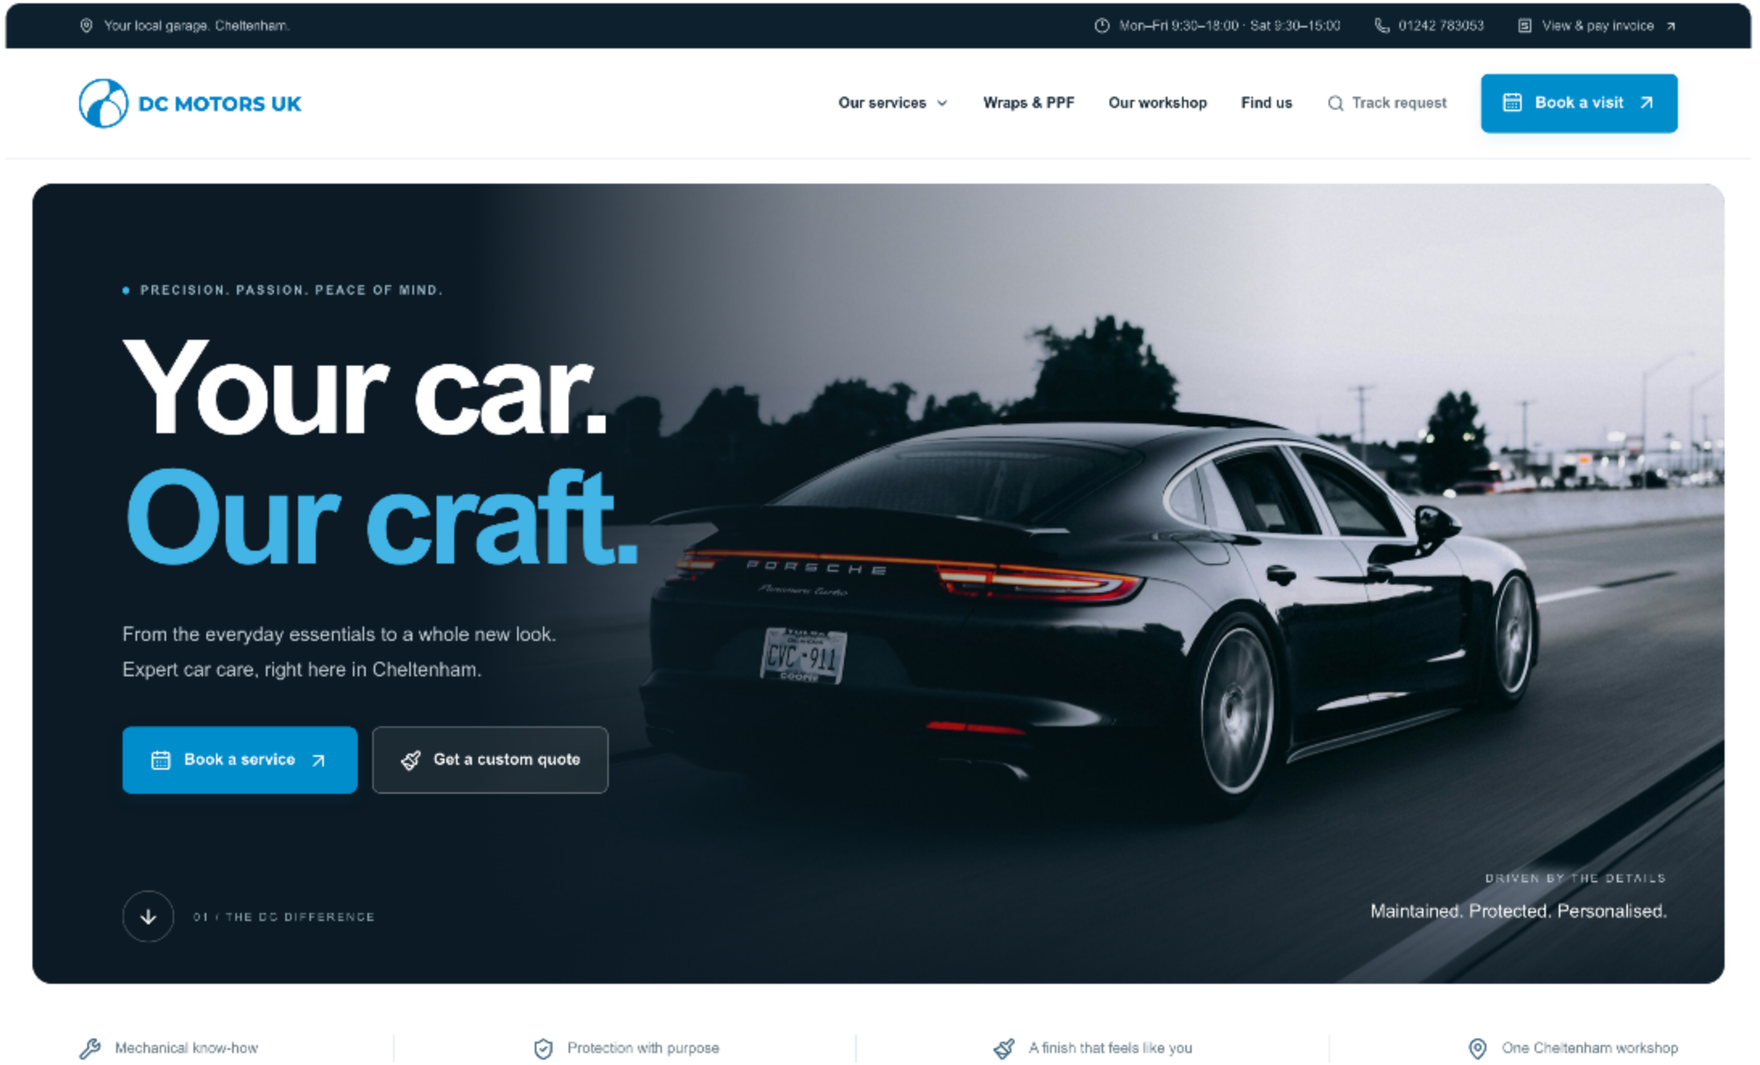

A stronger first impression

Clear service routes

Customers can find the work they need and choose a relevant next step.

Direct actions

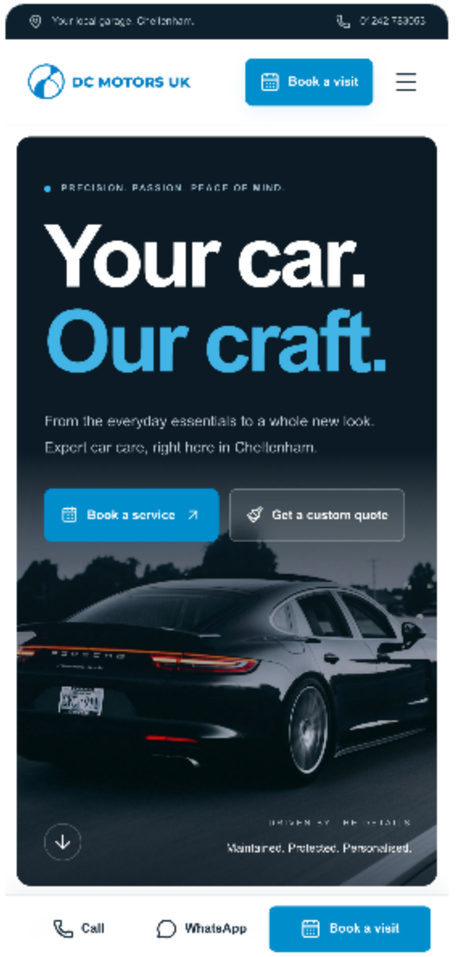

Booking, quote enquiries and contact options stay visible.

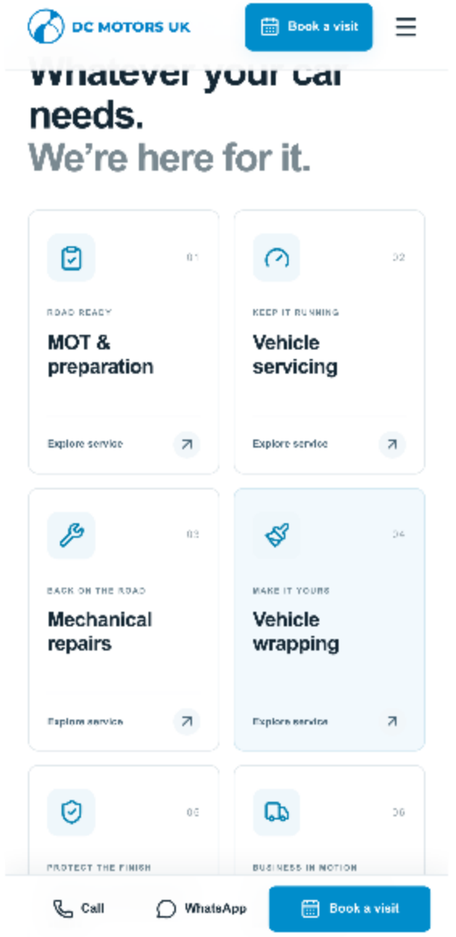

Designed for customers on their phone

The key actions remain within easy reach

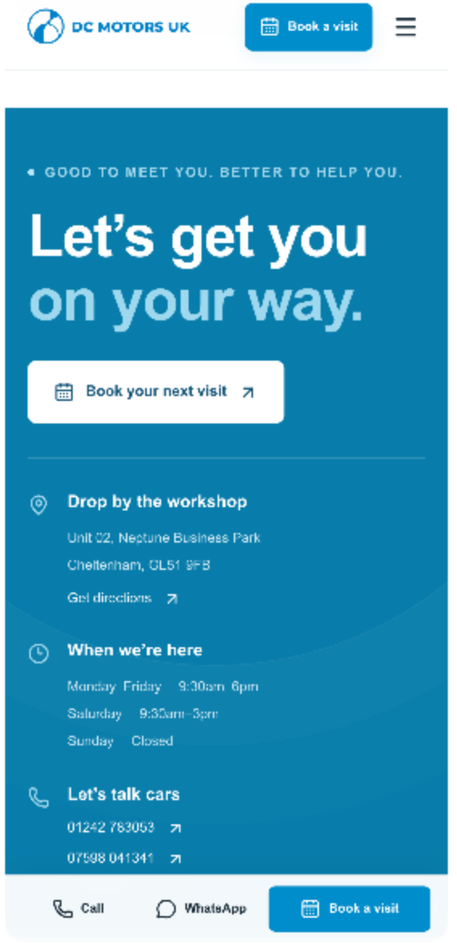

Explore the services.
Request a visit.
Contact the workshop.

Homepage

Services

Contact

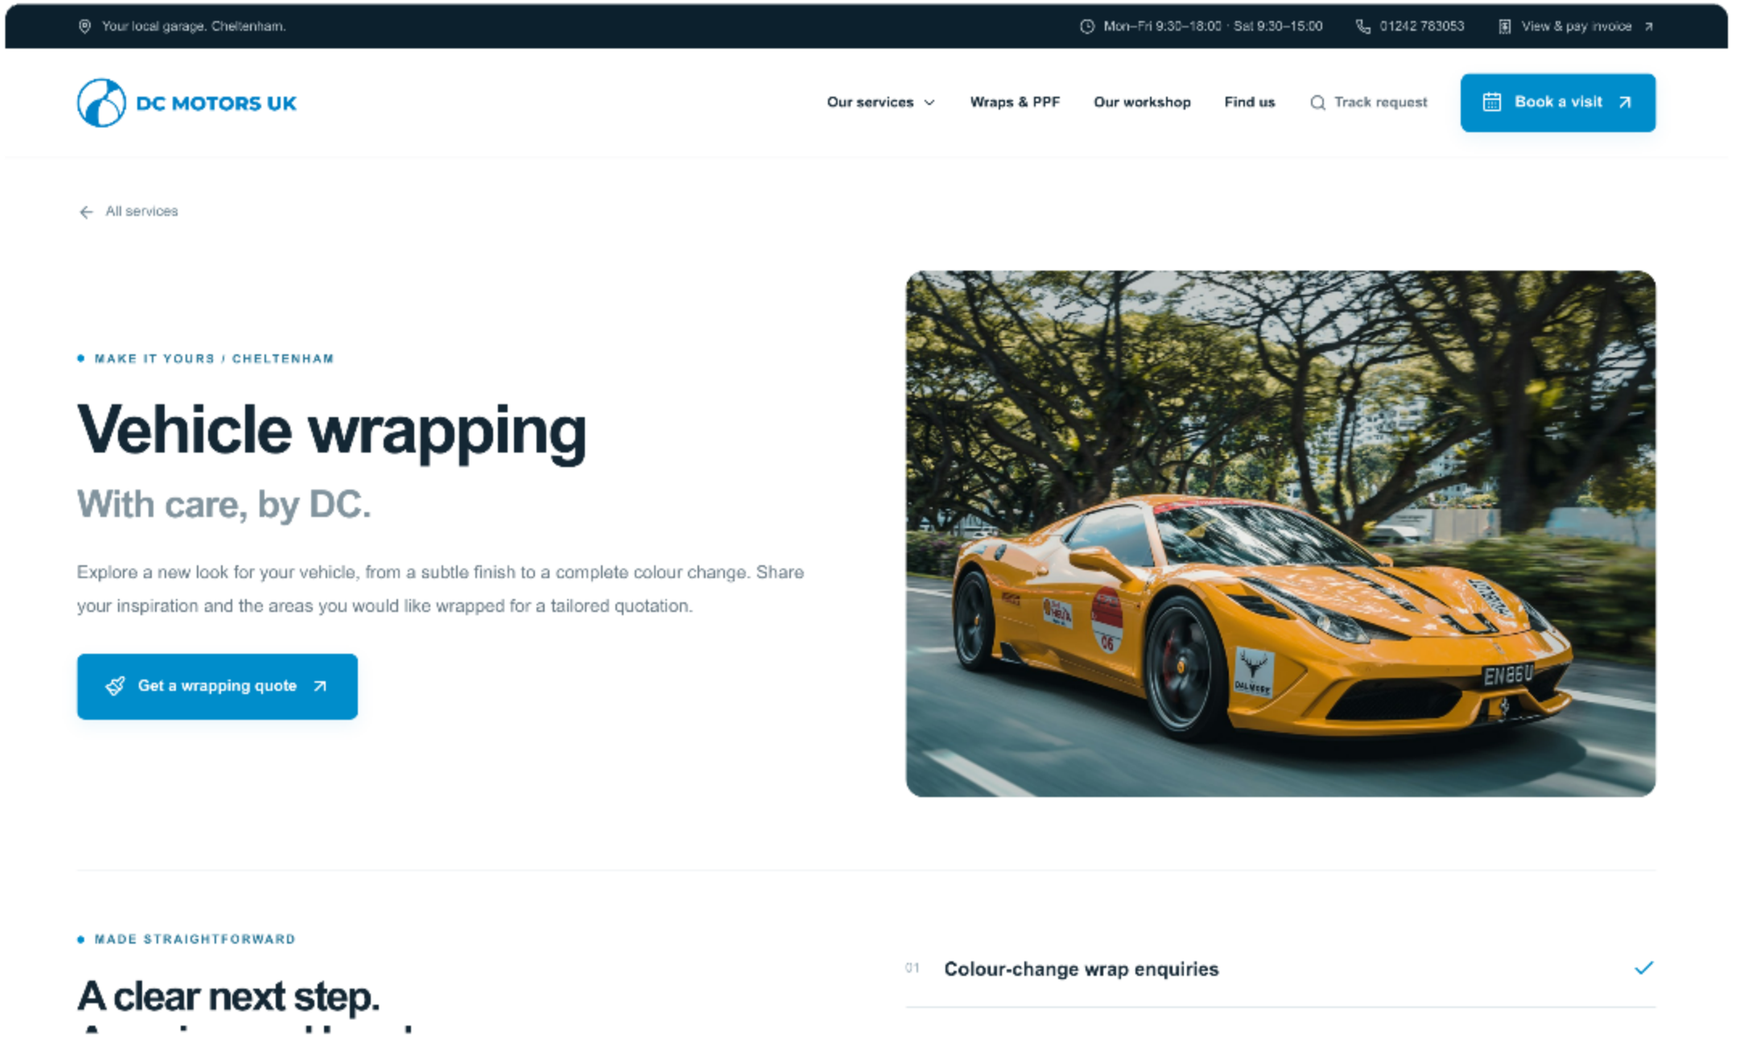

Services that are easy to explore

Every service has a place

Dedicated pages explain the next step for routine care and custom work.

Existing services stay connected

Used cars, invoice payment and contact links retain their roles.

Calendar booking on mobile

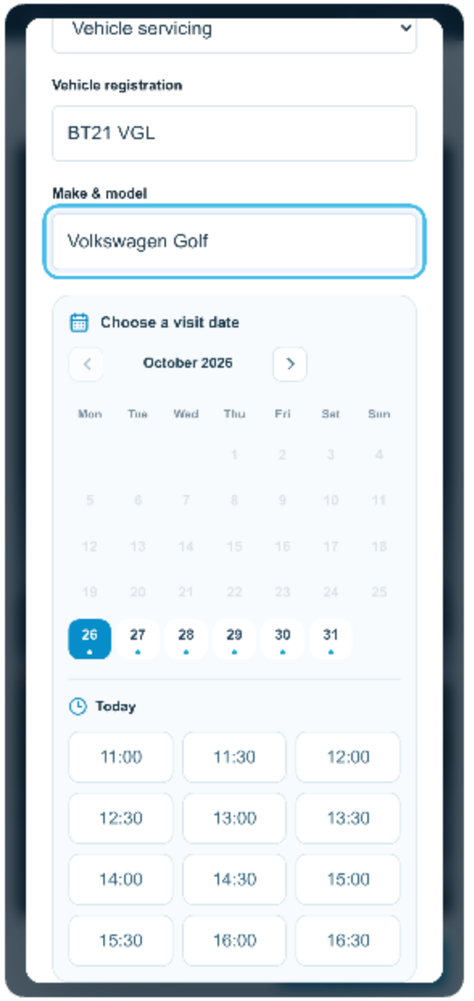

Choose an available time

The calendar reflects the workshop's scheduling rules.

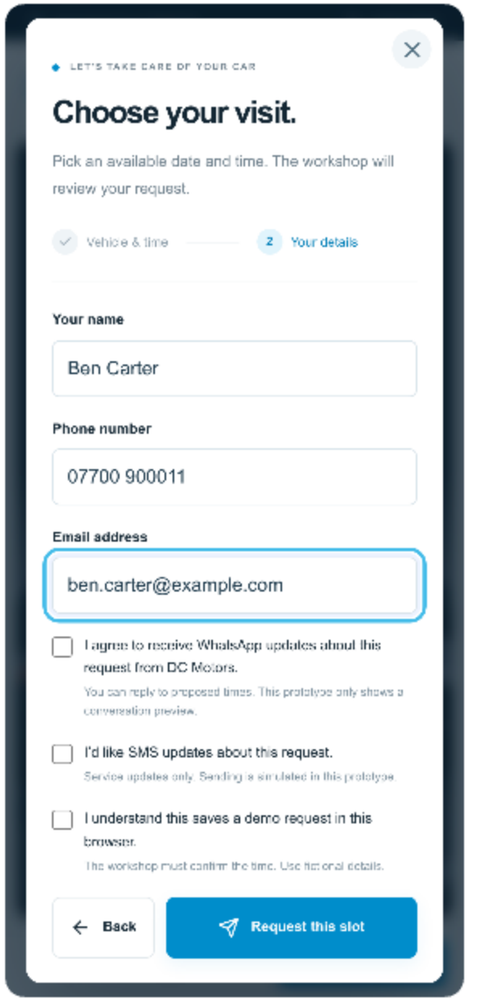

Share the details once

The request carries the vehicle and contact information into admin.

Staff confirm the appointment

Date & time

Customer details

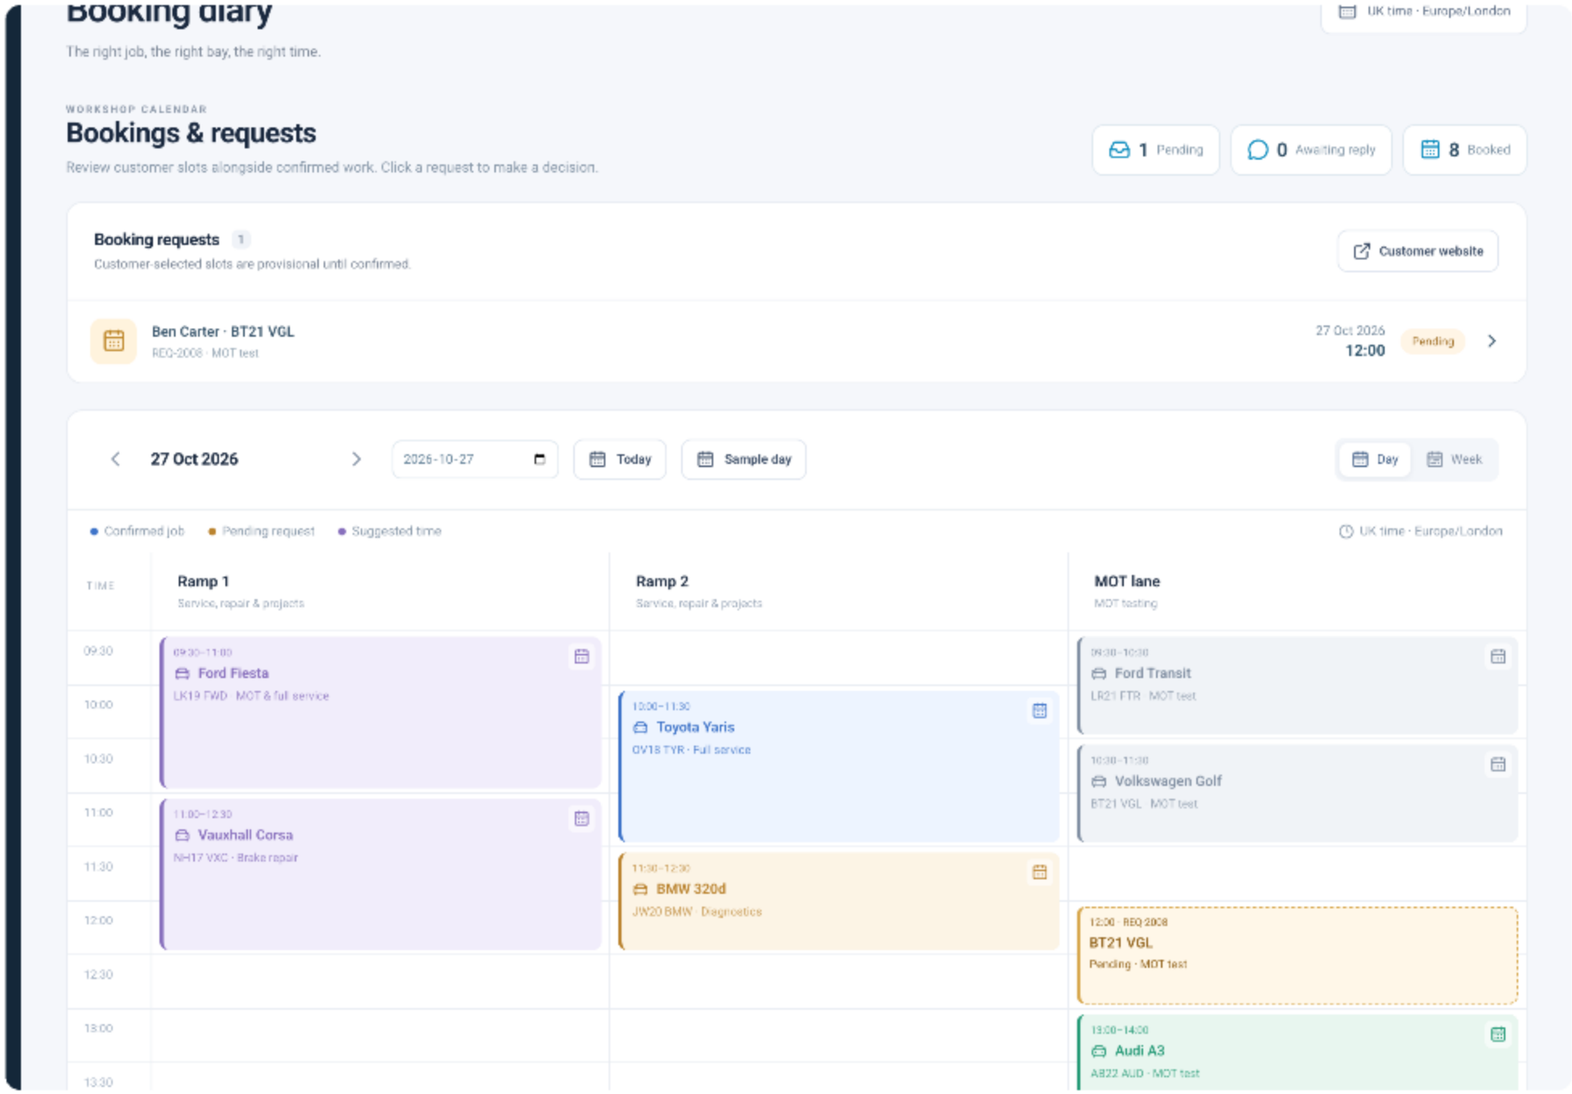

A calendar that keeps staff in control

One scheduling view

Customer requests appear beside work already booked.

Staff make the decision

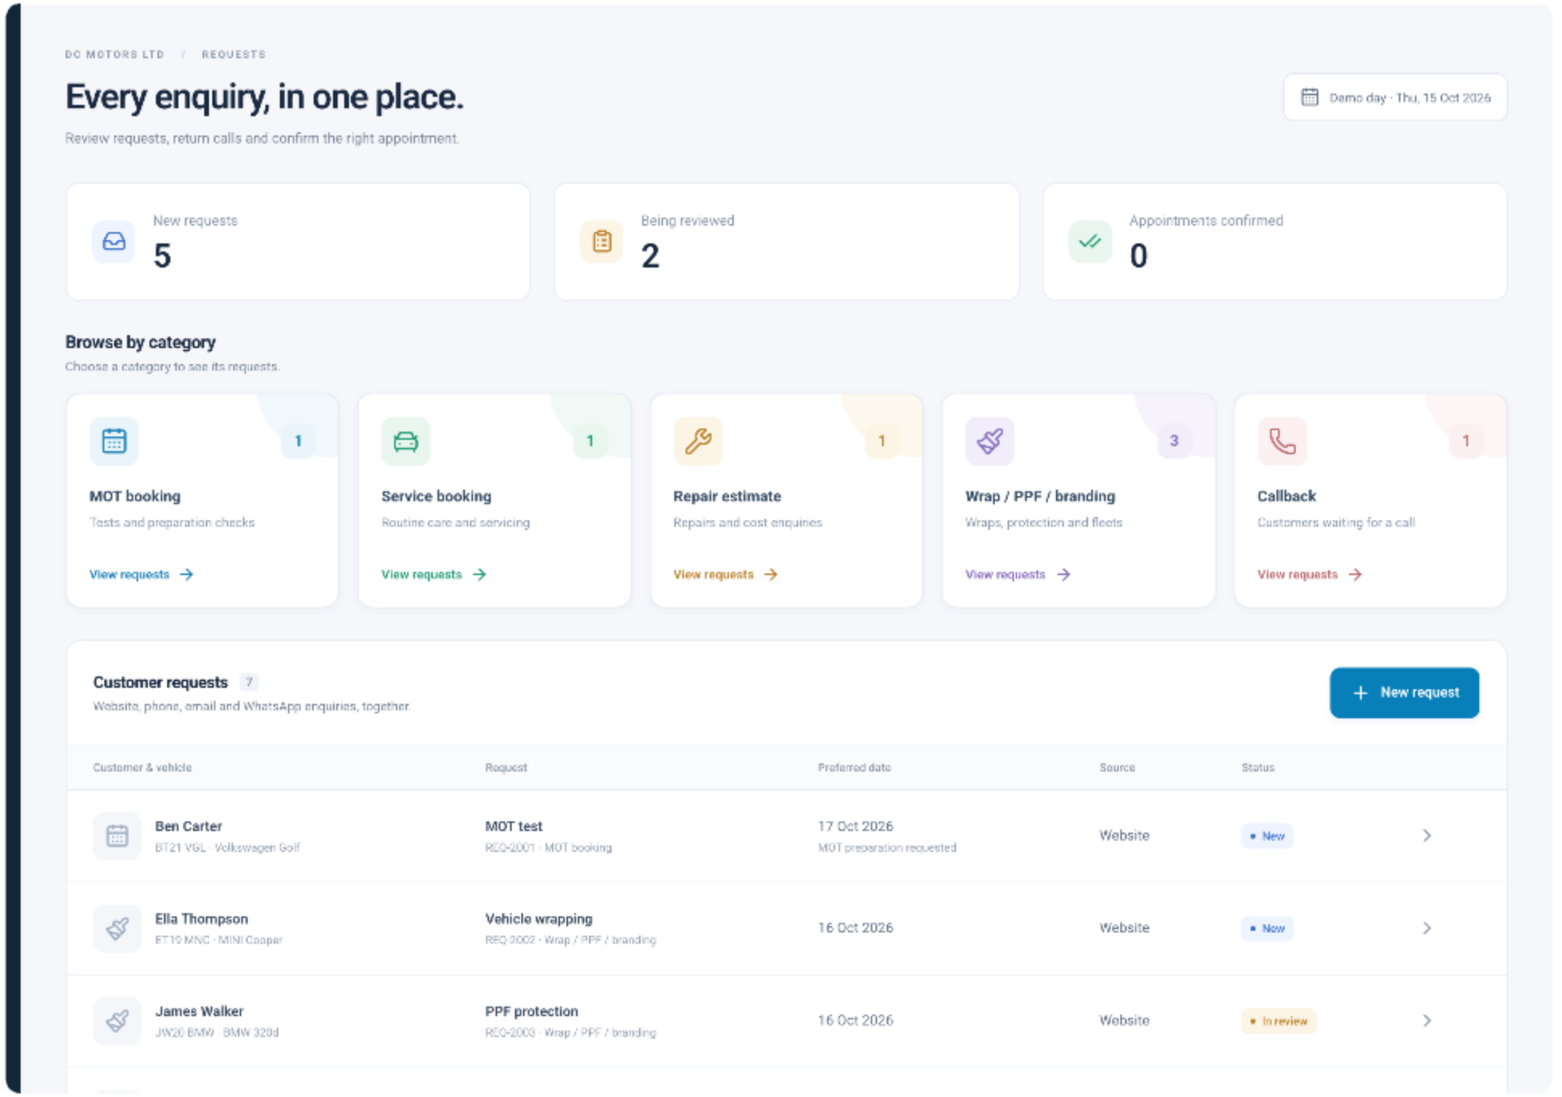

Confirm, decline or agree another time before the visit.

Every enquiry has a clear next step

Categories help staff find the right enquiry

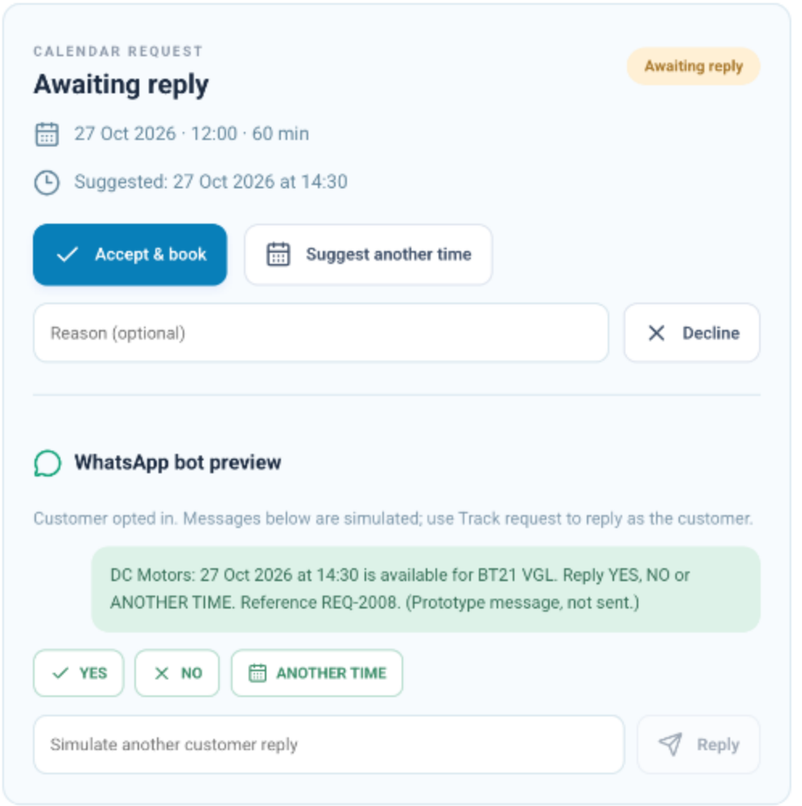

Each request retains the customer, vehicle, source and decision history.

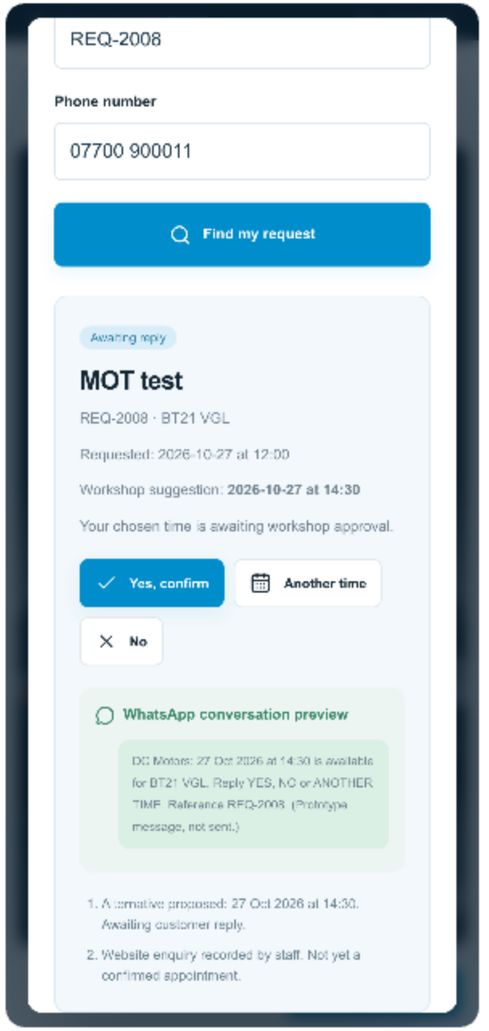

A better way to agree a new time

Staff suggests a slot. The customer can reply.

Available alternatives stay connected to the same request. Staff can step in when a reply needs attention.

WhatsApp conversation shown in simulation. Live delivery requires the company's API connection.

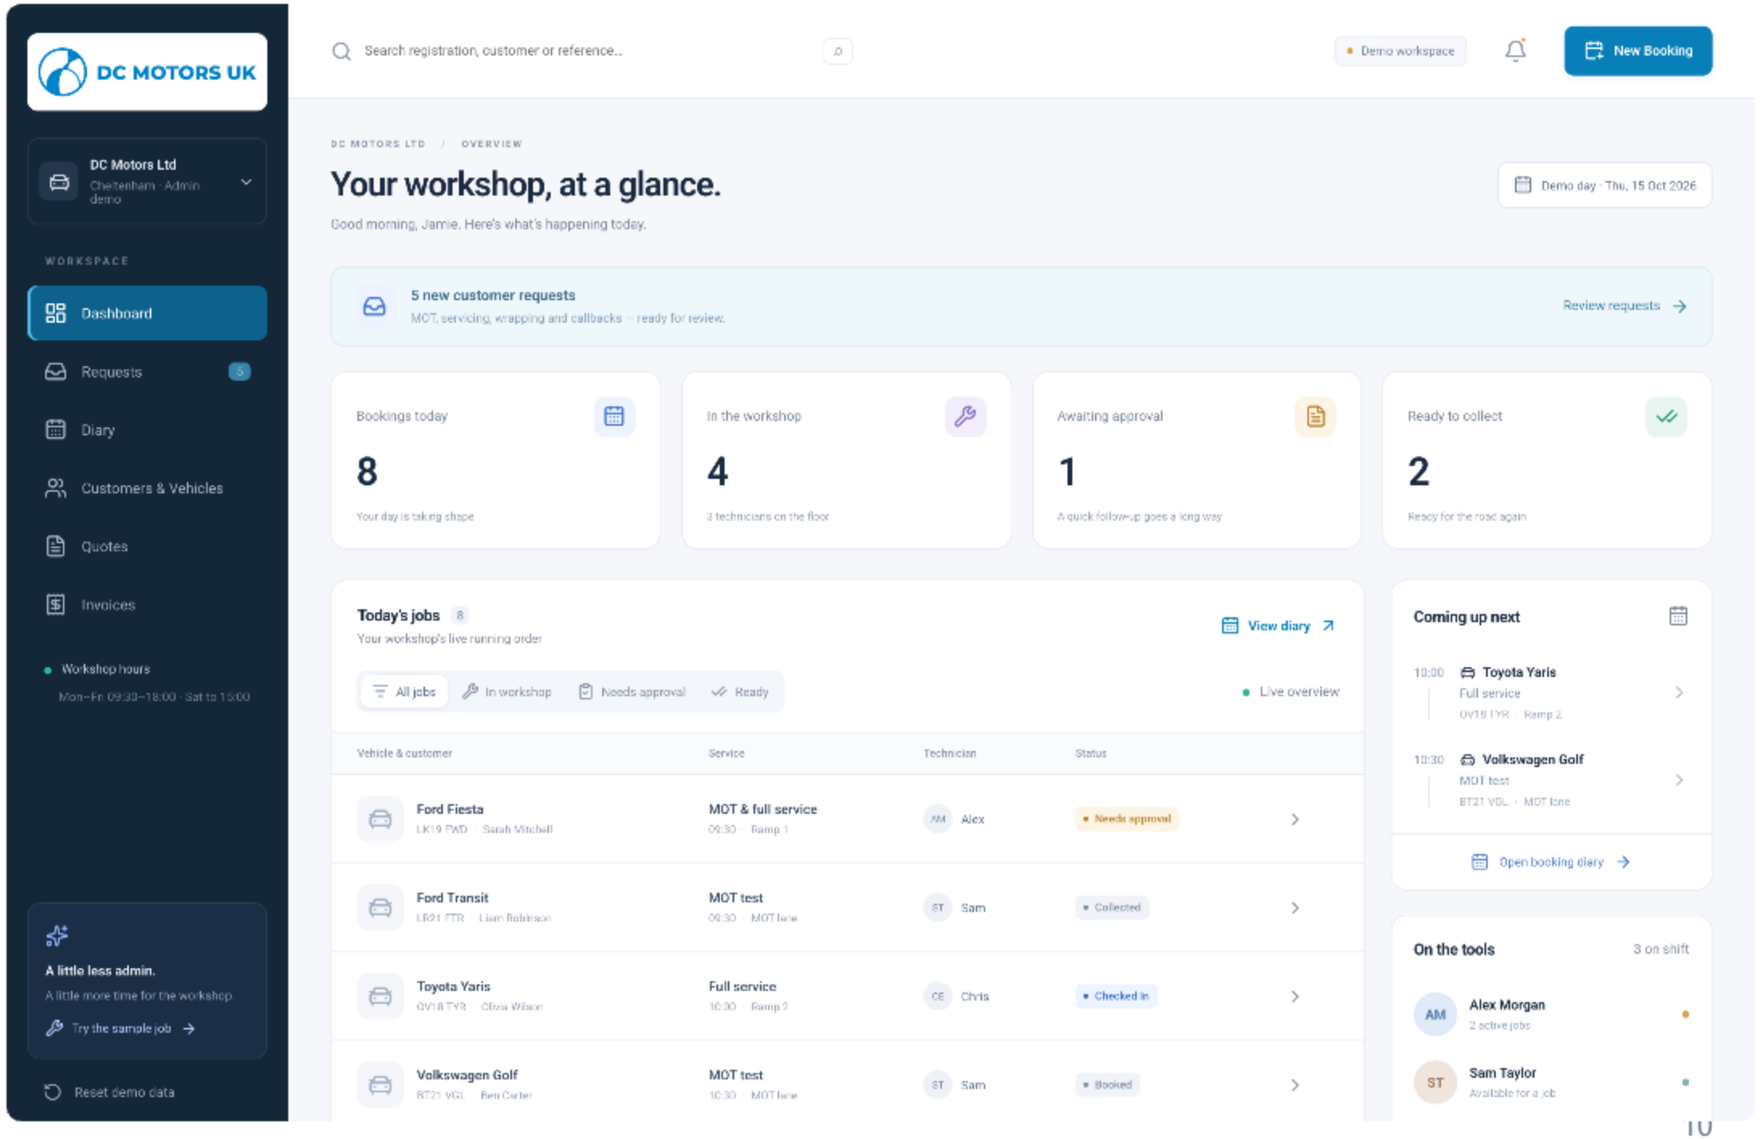

The workshop, at a glance

Attention where it matters

The team can see approvals, collection status and balances.

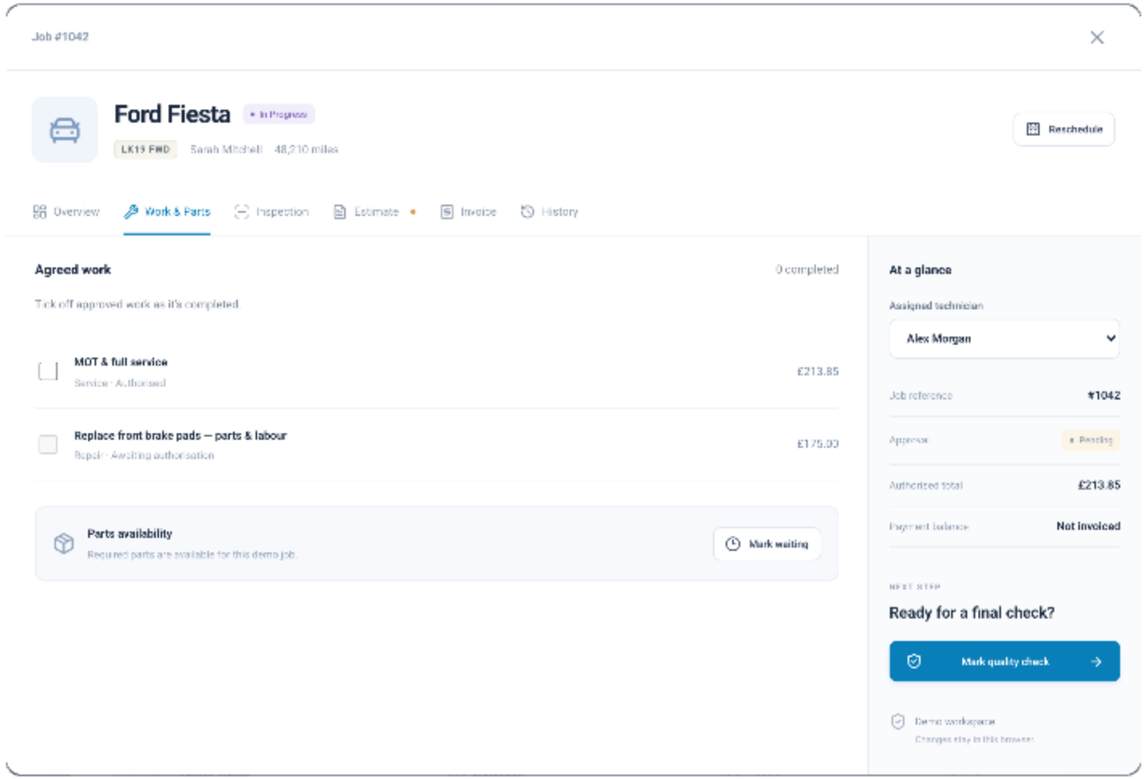

Quick access to the work

Open a job, review an enquiry or move into the diary.

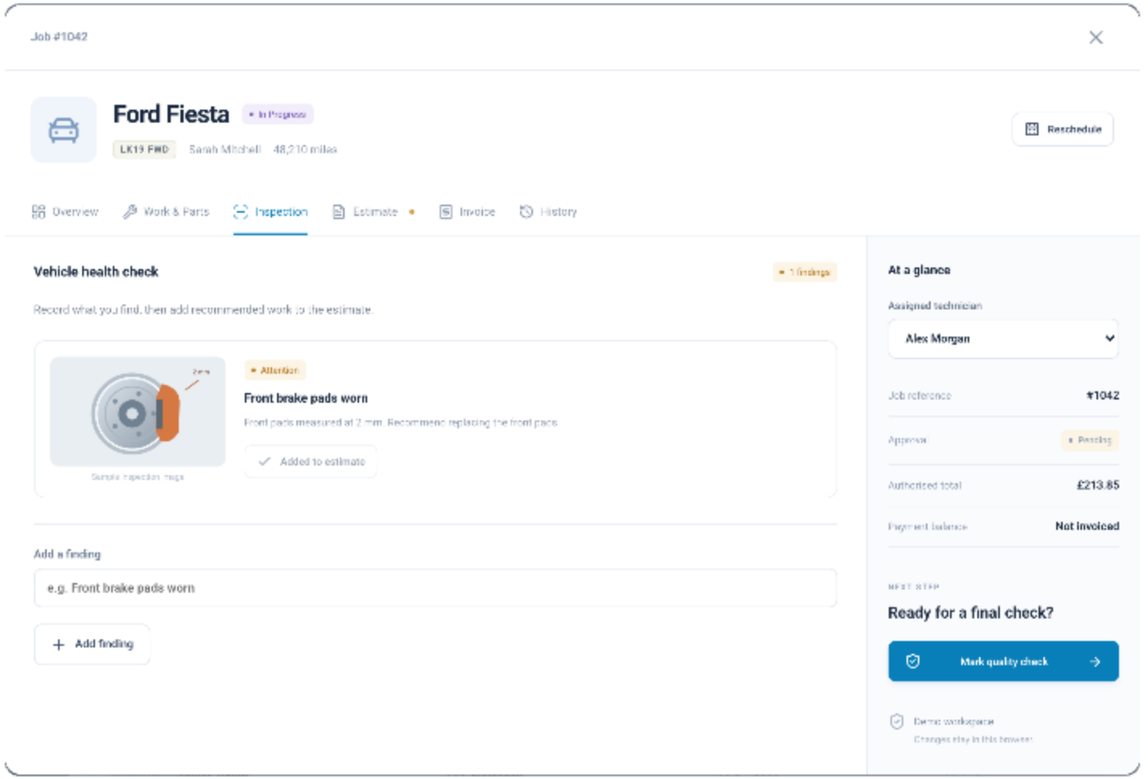

The job stays connected

Work & parts

The team sees the tasks and parts linked to the visit

Inspection findings

Findings remain attached to the same job record

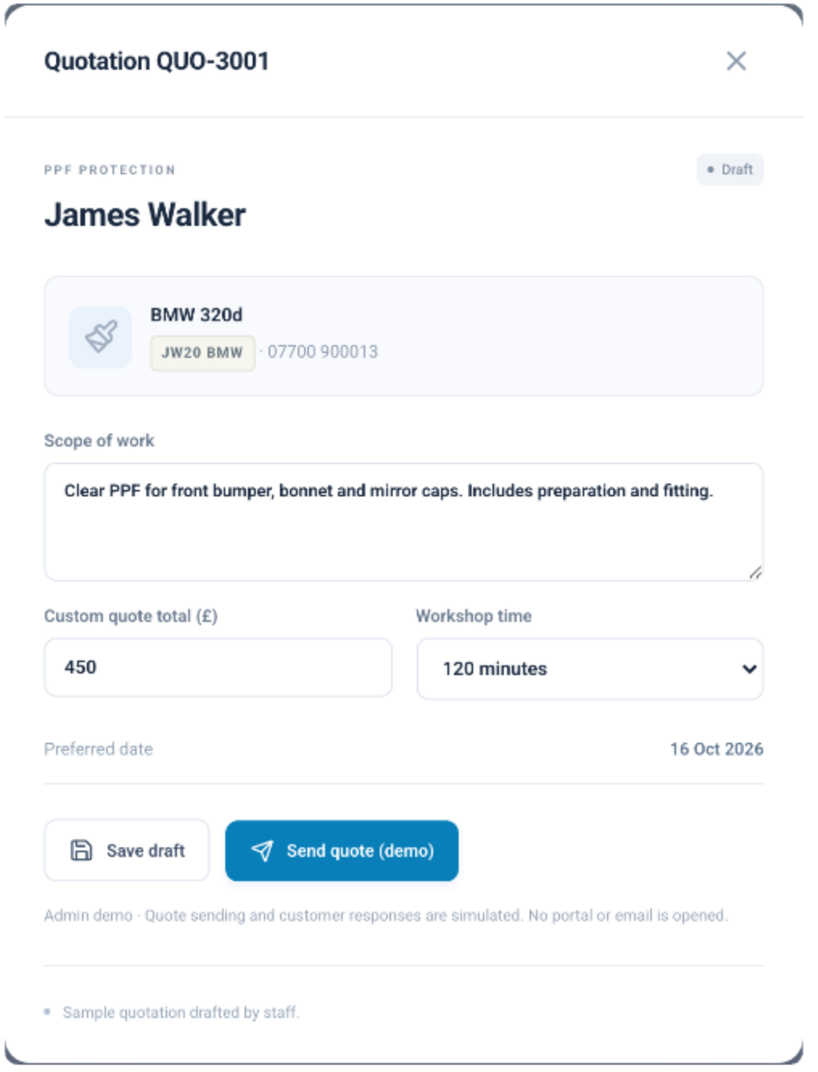

Clear quotations for custom work

The scope and price stay together

A visible quotation status

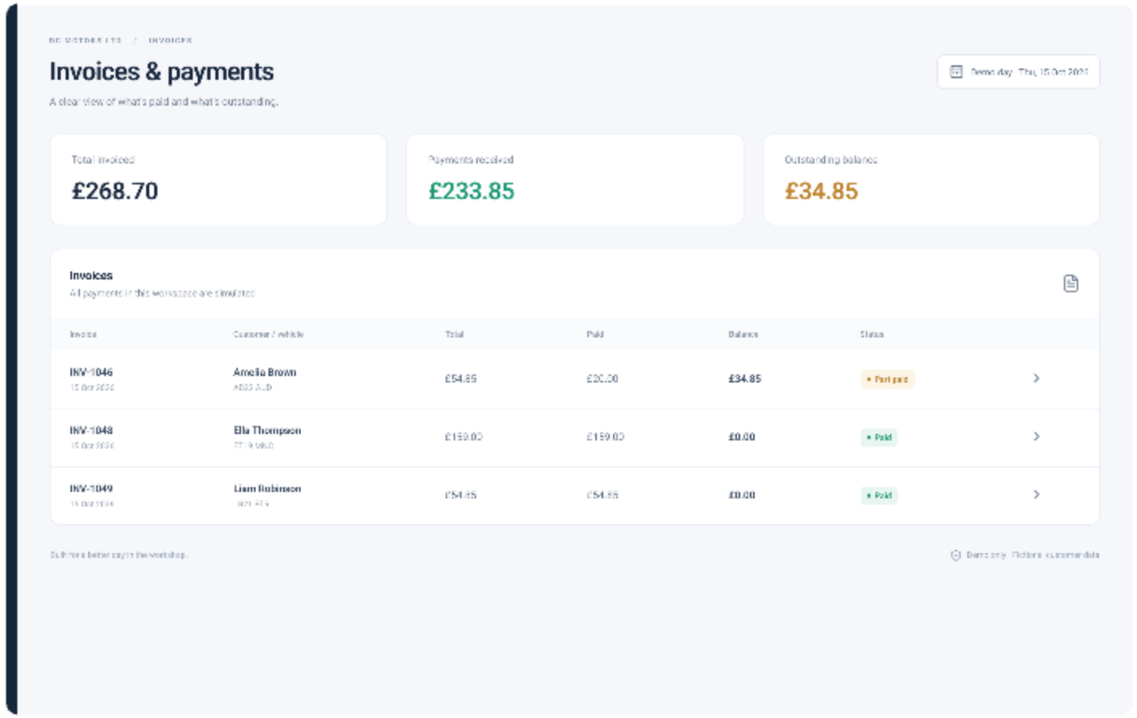

Staff can follow a quote from draft to an accepted booking.

Useful for wrapping, PPF,
fleet branding and repair estimates

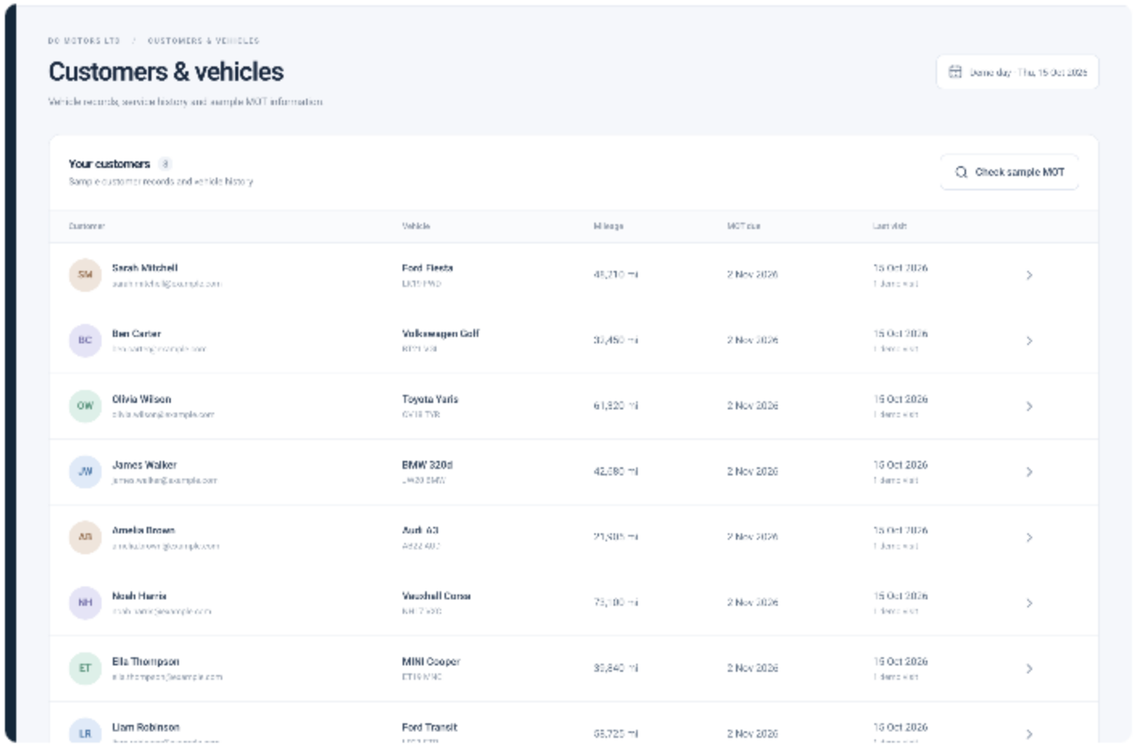

Invoices and customer history

Invoice visibility

A clear view of sample balances and payment status

Customer & vehicle records

Visit history helps staff keep the context of each vehicle

What this means for DC Motors

A clearer enquiry path

Customers can move from the right service to a relevant request.

Less repeated information

Customer and vehicle details stay with the enquiry and job.

Better scheduling visibility

Staff can compare provisional requests with confirmed work.

More consistent follow-up

Suggested times and decisions share one request history.

A controlled path to launch

The prototype makes the customer journey and workshop workflow ready to review

01	**Agree the operating rules**	Confirm services, visit durations, resources and approval responsibilities.
02	**Connect the live services**	Add secure accounts, shared data and the company WhatsApp connection.
03	**Pilot with the workshop team**	Test real scheduling scenarios, customer replies and staff handoffs.
04	**Launch and measure**	Use approved content and review enquiry handling and booking outcomes.
